

Cost-effective Electrical Energy Storage (EES) for our future Smart Grid

Clean and Affordable Energy Supply for Everyone

Clean and Sustainable Energy Security

Electrical Energy Storage (EES) is the Achilles Heel of an economically viable Energy Transition

Supply the most appropriate Type of Battery to the Asset Owner

SMT Energy AG offers safe, reliable and cost-effective Electrical Energy Storage (EES) on the basis of Redox Flow Batteries (RFB) for our future Smart Grid.

Unlike other battery technologies, our solution provides superior cycle stability, can be discharged to 100% without an effect on lifetime, is inherently safe and non-flammable, at a competitive price with a low cost of ownership.
